

CT Lien Solutions
The Nation's Largest
UCC Filer

Reduce Costs. Lower Risk. Gain greater control. Everything you need to file faster, better, more accurately.

Only CT Lien Solutions provides the leading technology and services to handle all your filing needs more efficiently and with greater accuracy. Whether you use our powerful technology tool, iLienOnline, or interface directly from your system to ours, count on the highest standards in UCC filing and management—from the nation's largest filer of UCC documents.

Our fully-automated filing system eliminates the need for you to prepare lengthy forms, research filing requirements in different jurisdictions or monitor your UCCs to ensure ongoing compliance. And, whether you do 100 filings or 10,000, we support you with a service team of filing specialists who not only understand the legal requirements and procedures of each jurisdiction, but whose process is the result of implementation of the Six Sigma methodology for operational excellence and customer focus.

- Increase filing efficiency and improve compliance with built-in “smart” features such as in-context searching; a dataentry wizard and an Intelligent Auditor;
- Reduce filing turnaround time — electronic filing with more than 30 states — nearly 60% of all filings we process are completed within minutes of submission;
- Store and share files with our unique online Portfolio Management center — serves as a single access point for everyone involved in a particular transaction;
- Save time with filing checklists and alerts; track the results with immediate access to the state and county public records data and imaged UCC documents.

CT Lien Solutions' lien technology tool, iLienOnline, is used by 14 of the top 15 financial institutions in the United States.
